

1) Robotics Project. 2021

St Edward's recently joined up with other schools from our Multi-Academy Trust to take a small group of pupils to St Bonaventure's secondary school where they were coached by older pupils in coding and robotics. They used a Lego Mindstorm™ kit and worked in mixed groups with children from across the borough. Children were able to create a variety of working robots.

2) Video Editing Project. 2022

St Edward's worked in tandem with staff and pupils at St Antony's. Year 4 children communicated with each other over Zoom to discuss their ideas before embarking on making short videos to showcase their dreams and ambitions and how they can achieve them.

3) Video Editing Project- Green Screen Edition! 2023

St Edward's has once again joined with our peers in the Lady of Grace Academy Trust to try and do even better than last year creating videos using green screens. This year we decided each school will focus on a different social media app and they will make an online safety advice guide. Our digital leaders hope to launch these in Summer 2023.
